

Calesce
Blend With The Layers

FROM SAND TO SPLENDOR: A TALE OF TRANSFORMATION

The narrative of Coalesce unfolds as a testament to craftsmanship, innovation, and a profound appreciation for the art of glassmaking. This handcrafted collection is a tribute to the timeless tradition and the meticulous care our artisans devote to each piece, creating not just products, but legacies of India's skilled artistry.

Let the Coalesce pendant lights be a source of inspiration in your home or workspace, a symbol of how when skilled craftsmanship and modern design coalesce, which means blend, the result is not just lighting, but enlightened art. These radiant glass lamps not only brighten spaces but also embody the fusion of time-honoured technique and modern design principles where each piece tells its own unique story.

ELOQUENT ILLUMINATION: THE SPIRIT OF GLASS SPUN INTO LIGHT

In the heart of Firozabad, a city steeped in the history of glassmaking, an ancient craft whispers the secrets of transforming simple grains of sand into exquisite artifacts of luminescence. Glass spinning is like a dance between man, material, and the elements—a delicate yet demanding process. Each pendant light is endowed with a soul, making them more than mere objects of illumination, emblems of artisanal heritage and contemporary elegance.

Spun on the lathe machine, each glass piece is held and rotated at a constant speed. With the sculpting aided by the gentle force of blown air, the pieces take on a distinctive form in every curve and contour. Layering takes centre stage, offering a mix-and-match approach that cordially brings together contrasting forms. Coalesce Pendant Lights are not just created; they are birthed from the fusion of sand, heat, and human spirit.

EMBRACING CLARITY, PROTECTING TOMORROW

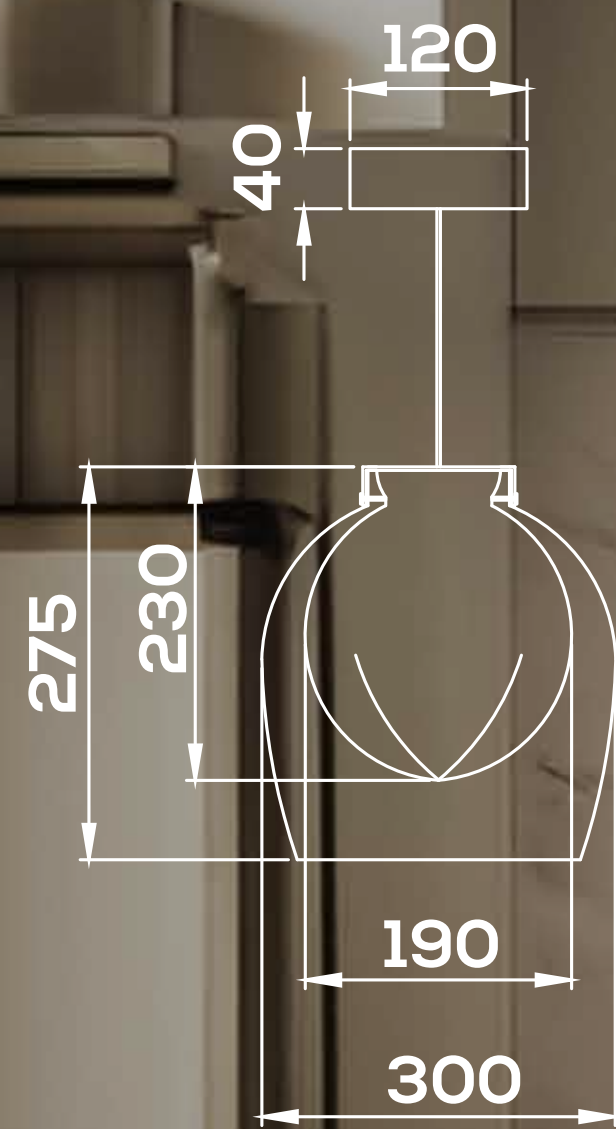

Our commitment to making a positive impact on our planet and people is at the forefront of our journey. Glass is nature's sustainable choice, forever transparent, eternally pure and completely recyclable for a greener world.

Our lighting products not only stand for their aesthetic brilliance but also for functionality, beauty, and sustainability. While acknowledging imperfections, we are treading towards a brighter future.

Aurora

Aurora's breath-taking display shaped with fluidity and grace, creates a radiant glow that imitates the mystical northern lights. This light can turn your space into an immersive art installation that surpasses the ordinary.

CL001

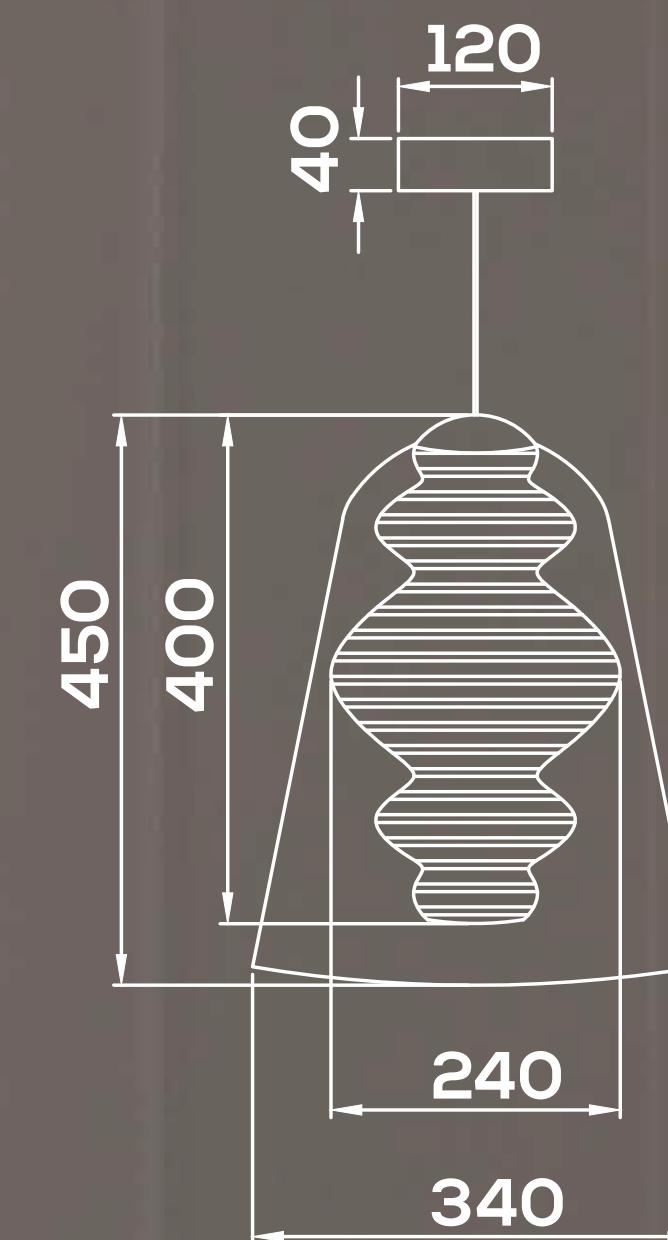

Rhapsody

Just as a musical composition plaits together diverse elements to create a hypnotising song, Rhapsody blends contrasting forms and textures impeccably. The symmetrical precision, fluidity of design and each layer contribute to this narrative of illumination.

Dimensions in mm:

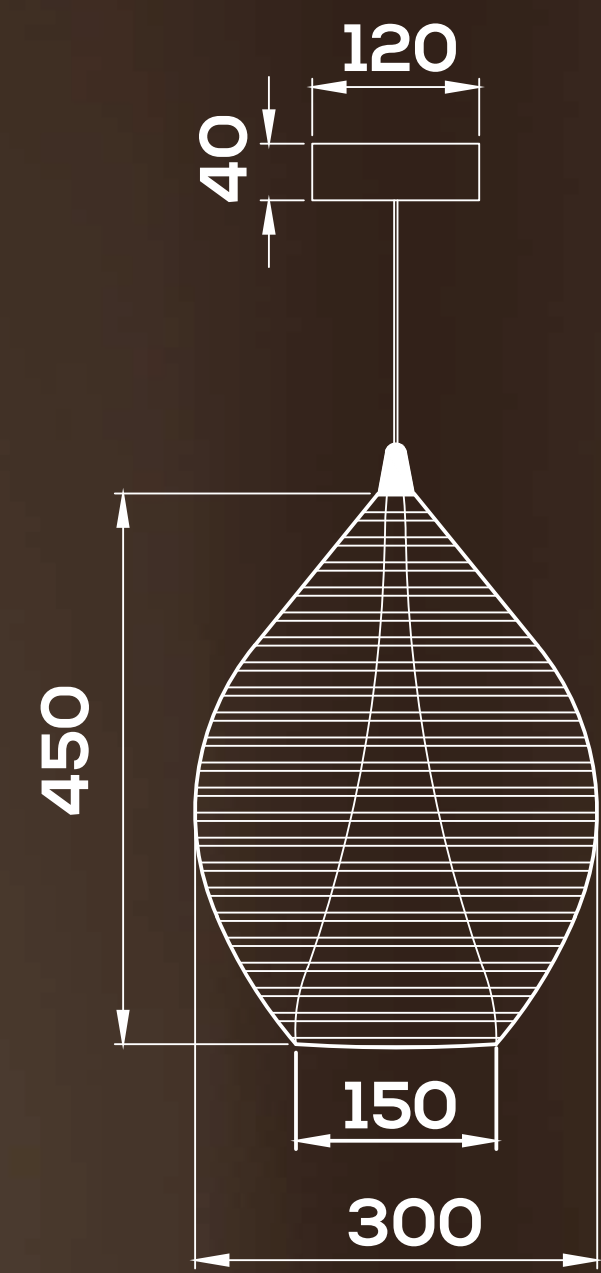

CL002

Prisma

A kaleidoscope of colors that bathes the space in a dynamic and lively glow, this piece is inspired by the delightful drama of light through prismatic elements it offers – a rather transformative experience redefining the boundaries of functionality.

Dimensions in mm:

CL003

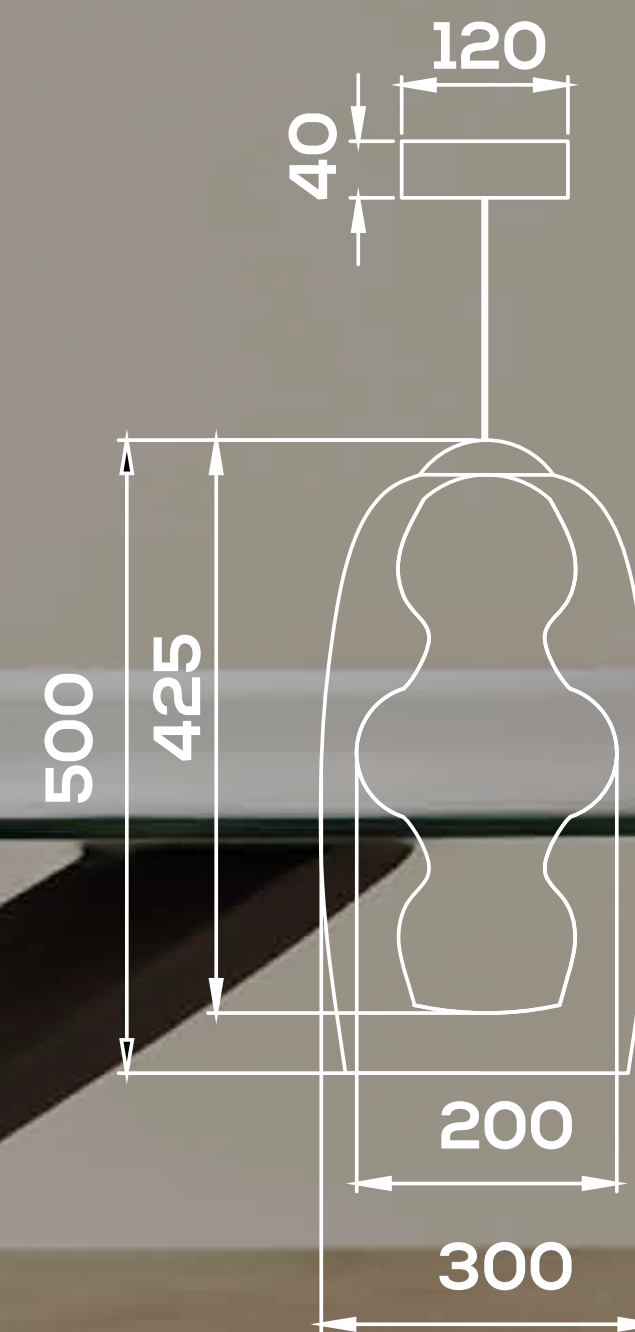

Nebula

The transparency of glass, different hues reminiscent of distant galaxies and the textured ribbings mimic the cosmic swirls that have fascinated humanity for centuries. Nebula brings the wonders of the cosmos into the heart of your space.

Product Specifications

General Features

Operating Temperature	0 - 45°C
Appliance Class	Class I
Ingress Protection	IP20

Construction & Materials

Housing	Borosilicate Glass
---------	--------------------

Finish (Housing)

Natural / Painted

LED Technology

CCT	2700/3000/6500 K
CRI	>80
Wattage	1xE27 9/12W
Life Time	30,000 Hrs (L70)

Special Note	Option of CE/UL certified E27 Holder available
--------------	--

Electrical Parameters

Type	Constant current
Power Factor	>0.9
THD	<10%

Protections

Over-Voltage Protection
Over Load Protection
Open-Circuit Protection
Short-Circuit Protection

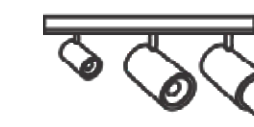

Care Guidelines

- Dust regularly with a soft tool or low-power vacuum.
- Use the correct bulb wattage to prevent heat damage.
- In damp conditions, use the light often to avoid moisture absorption.
- Natural color aging is normal; proper care slows this down.
- Handle gently, keep out of reach from kids and pets.
- Avoid moisture and direct rain exposure. Intended for indoor use only.

Other Lighting Solutions Offered

Tracks and spots
